Meet Louis, a creative kid born in 1995. Louis is looking forward to being a part of a loving and nurturing family. He is interested in reading, writing, and clothes. He refers to himself as being colorful and likes alternative music. We took Louis to the legendary Magic Castle in Hollywood, California where all the pre-show happenings were going on for this year's Kids' Choice Awards.

It took Louis a little time to get acclimated to all that was going on around him and at times he seemed almost overwhelmed by all the attention and effort being lavished upon him. For many kids, especially older ones in foster care, ego strength can be hard to come by. This can be especially true when their lives have lacked -- through no choice of their own -- the consistency found in a stable and nurturing home environment.

On this day, Louis was interested in accessory items such as unique designer watches to enhance that personal look in which teens pride themselves. As we watched Louis play foosball with his social worker and with our news anchor, we saw that he also values interpersonal relationships. While attending a Hollywood shindig had its moments, it seemed clear that Louis places such things secondary to what he wants and needs the most...a permanent and loving family to accept him unconditionally.

We're hoping that someone out there senses that Louis might be a magical fit for their family. Older kids like Louis still need and deserve the sense of belonging found in family, and becoming family to a kid like Louis is a worthy choice!
