

Can't locate a school?

Try using

%

with School Name

Or Simply enter

Zip Code or City of School.

When you cannot easily find a school here are a couple of tricks:

- 1) Type in little information: School Type: Public/ Private/ Independent/ or home school. Then type in the Zip Code of where the school is located or you can also try the city (but larger cities lists are too long), hit tab then okay and a list of all the schools in that area will appear
- 2) Type in School Type: Public/ Private/ Independent/ or home school. Then type in some of the school name with % sign before and after the name. For example: %Baptist% or %Washington% or %Opportunities%, hit tab and then okay.
 - . *If you first use Public and the school does not appear, just choose search again and change to Private and last to Independent or home options.*
 - *Remember Charter Schools are Public and most non-public schools are listed as Private.*
- 3) If the school is still not located send an email to Youth Education Support@dcfs.lacounty.gov and let us know to add the school.
